

## IMAGINE SURFACES ACRYLIC ADDITIVE

### Technical Data Sheet

Our Acrylic Additive is made from 100% Acrylic Polymer and designed to be used as a Bond Coat (apply to surface before texture step or painting) and be used as an admixture for Imagine Surfaces Texture and Stamp mix.

As a Bond Coat the Acrylic Polymer increases adhesion to the application surface. It will help elevate those problem areas on existing concrete. Use on existing concrete where an overlayment will be used or use to increase adhesion where only painting existing concrete. Apply a thin coat of Imagine Surfaces Bond Coat, let dry then apply Imagine Deck Coating or the Imagine overlayment system.

#### Physical Properties:

Polymer:	100% Acrylic
Wt./gal.:	8.78 lbs./gal.
Specific Gravity:	1.053
Color:	Milky white
Odor:	Slight sweet acrylic
Coverage:	(as a Bond Coat) 200 / 250 sq. ft./ gal in texture- 1 _ gal per 50 lb bag. , in stamp 1 gal. per 50 lb. bag.
Application Temp.:	Surface must be above 45F.

Designed for Industrial use only.
